

MOHAMED AYMAN

Senior Data Scientist | Analytics Lead | ML Engineer | BI & Data Strategy

6th of October City, Giza, Egypt | +20 1060060292 | mohammed.ayman.stat@gmail.com

[LinkedIn](#) | [Portfolio](#) | [GitHub](#) | [Upwork](#)

PROFESSIONAL SUMMARY

Senior data science and analytics professional with 5+ years of experience across sports/fitness, healthcare, banking, telecom, education, academic, consulting, and global freelance analytics. Builds predictive models, executive BI products, automated reporting workflows, and analytics-ready data products that convert complex business questions into decision-ready outputs. Strong in churn prediction, customer intelligence, credit risk analytics, forecasting, segmentation, NLP/sentiment analysis, stakeholder communication, and production-minded ML, with current development in GenAI, AI agents, AWS Bedrock, deep learning, and data engineering.

EDUCATION

- M.Sc. in Data Science, In Progress | Faculty of Graduate Studies for Statistical Research, Cairo University | Expected 2027
- B.Sc. in Statistics | Faculty of Economics and Political Science, Cairo University | 2021

CORE SKILLS

- **Machine Learning & AI:** churn prediction, risk scoring, classification, regression, clustering, RFM, customer segmentation, NBO, forecasting, model evaluation, feature engineering, NLP/sentiment analysis, A/B testing, uplift measurement.
- **BI & Executive Analytics:** Power BI, Tableau, Excel, DAX, Power Query, KPI design, executive dashboards, revenue-impact reporting, credit risk dashboards, CVM analytics, market intelligence, data storytelling.
- **Data Engineering, Cloud & GenAI:** Python, SQL, R, pandas, NumPy, scikit-learn, PySpark, Kafka, MongoDB, Docker, ETL, Microsoft Fabric, DWH/lakehouse integration, gold-layer design, Amazon Bedrock Knowledge Bases, Boto3, prompt/instruction design, reporting automation.
- **Leadership & Business:** stakeholder management, requirements translation, analytics strategy, mentoring, cross-functional delivery, executive communication, consulting, business problem framing.

PROFESSIONAL EXPERIENCE

Lead Data Analyst

Leejam Sports Company | Apr 2025 - Present | Remotely, Egypt

- Lead analytics and data-product work across subscriptions, clipcards, visits, bookings, participation, CX tickets, PT/GX surveys, members, centers, agreements, sales sources, subscription periods, and date dimensions.
- Designed a unified executive analytics layer using a galaxy-schema model connecting commercial, operational, customer, and experience datasets for leadership KPI monitoring.
- Built a member_360 AI product with 80+ member features powering churn/risk scoring, RFM, segmentation, clustering, next-best-offer scoring, personalized AI messages, target/control assignment, uplift measurement, and dashboarding.
- Contributed to an enterprise Claude AI analytics assistant surfaced in Microsoft Teams and integrated with the DWH, lakehouse, and Microsoft Fabric workspace; owned the Amazon Bedrock Knowledge Base contribution by grounding it in data schemas, KPI definitions, business instructions, security guardrails, and validation logic to improve numerical consistency, KPI interpretation, and conflict resolution.
- Developed churn prediction and retention analytics to identify at-risk members and support proactive retention decisioning; model-performance metrics remain internal pending approval for public sharing.
- Integrated competitor-intelligence scraping and NLP/sentiment analysis on CX tickets and PT/GX survey data to classify customer intent, route issues, compare market position, and connect experience drivers to centers.
- Mentor junior analysts and translate stakeholder requirements into scalable data models, analytical views, BI outputs, and business-ready decision products.

Data Scientist Supervisor

IDH | May 2024 – May 2026 | Smart Village, Egypt

- Support Customer Value Management (CVM), digital marketing, marketing strategy, operational strategy, brand strategy, business reviews, and monthly performance reviews with advanced analytics and executive-ready reporting.
- Modernized CVM campaign targeting into automated, ML-enabled segmentation and impact-reporting workflows, increasing monthly campaign impact from approx. EGP 10M / 15K visits to approx. EGP 40M / 45K visits within three months and supporting an annual incremental-revenue trajectory above EGP 300M versus approx. EGP 100M-110M previously.
- Built an AI-driven branch-expansion/site-selection model for a 600+ branch laboratory network using internal performance, customer behavior, scraped external signals, healthcare-facility density, pharmacies, clinics, doctors, population, GDP, and geospatial factors; 15 of 20 recommended locations were accepted in the first year.
- Developed a (House Call) classification model to identify branch customers likely to shift from branch visits to the higher-profit service, supporting targeted offers that generated approx. EGP 3M monthly incremental revenue.
- Created automated Power BI dashboards for sales, operations, marketing, and executive teams; supported digital marketing targeting, doctor master-data cleansing, partnership-prospect scraping, and revenue-impact reporting.

Data Analytics Officer

Credit Agricole Egypt Bank | Jul 2023 - Apr 2024 | New Cairo, Egypt

- Automated Retail Risk reporting pipelines, improving reporting efficiency by 40% and reducing manual reporting errors.
- Developed Power BI dashboards to monitor credit risk KPIs, cost of risk, portfolio performance, and policy impact for Retail Risk stakeholders.
- Supported IFRS 9 model analysis, ad-hoc investigations, portfolio reviews, and analytical outputs used in strategic risk decision-making.
- Improved recurring data extraction, validation, and reporting processes using SQL, Power BI, Excel, R, and statistical analysis.

Data Analyst

Huawei Technologies Co. | Jan 2022 - Jun 2023 | New Cairo, Egypt

- Managed Egypt incentive-calculation analytics for telecom dealers and operators, supporting accurate commercial performance tracking.
- Automated executive reporting workflows, saving more than 30 hours per month in manual work.
- Built market analysis and competitive intelligence dashboards to support sales planning, business reviews, and strategic decision-making.
- Delivered analytical problem-solving training sessions for business teams, improving data interpretation and decision quality.

Freelance Data Analyst / AI Product Contributor

Upwork & Private Client Work | Oct 2019 - Present | Remote

- Maintain Top Rated status and 100% Job Success on Upwork, with 60 public jobs listed plus additional private-client analytics engagements.
- Deliver dashboards, data cleaning, survey analysis, SPSS crosstabs, statistical modeling, Python/R analysis, Power BI/Tableau reporting, and performance insights for business and research clients.
- Support academic researchers and business teams with research design, hypothesis testing, statistical consulting, and analytical interpretation.
- Contribute as a freelance data and AI professional to a confidential AI-enabled interior design MVP delivered through a company/client context.

SELECTED PROJECTS & BUSINESS USE CASES

- **Member 360 & Customer Intelligence Platform:** Built a gold-lakehouse member analytics product covering 80+ features, churn/risk scoring, segmentation, RFM, clustering, NBO, personalized messaging, target/control testing, uplift measurement, and dashboarding.
- **AI Branch Expansion & Site Selection:** Developed a geospatial ML scoring approach combining internal performance, customer behavior, scraped market signals, population, GDP, and healthcare ecosystem density to recommend new branch locations.
- **Credit Risk Analytics & IFRS 9 Support:** Built dashboards and analytical outputs for Retail Risk teams, supporting credit KPI monitoring, cost-of-risk visibility, policy impact review, and model-related investigations.
- **Real-Time E-Commerce Data Engineering Pipeline:** Public portfolio project using Python, Kafka, PySpark Structured Streaming, a three-layer lakehouse design, MongoDB, Docker Compose, Power BI planning, and forecasting.
- **Enterprise AI Analytics Assistant:** Contributed to an assistant surfaced in Microsoft Teams and integrated with Microsoft Fabric, the DWH, and lakehouse; configured the Amazon Bedrock Knowledge Base with schemas, KPI definitions, instructions, security guardrails, and validation logic.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- **Completed:**
 - Data Engineering Scholarship - AI & Data Science Track, DEPI Egypt (Jun 2026);
 - Machine Learning Diploma, CSkilled Academy / Dr. Mostafa Saad (2026);
 - ML Zoomcamp, Alexey Grigorev (2025);
 - Microsoft Power BI Engineer, DEPI (2024);
 - Business Intelligence Developer, ITI (369 hrs, 2023);
 - Data Science Diploma, Machinfy (2022);
 - Credit Scoring Analysis with Python, 365 Data Science (2022);
 - Data Analyst Career Path, LinkedIn Learning (2021);
 - IBM Data Analyst Professional Certificate, Coursera (2019);
 - Data Analyst Nanodegree, Udacity (2019).
- **In Progress:**
 - Deep Learning Diploma, CSkilled Academy / Dr. Mostafa Saad;
 - AWS Generative AI and AI Agents with Amazon Bedrock Professional Certificate, Coursera;
 - Generative AI Engineering Learning Path, Coursera;
 - AWS Artificial Intelligence Practitioner, Coursera;
 - Deep Learning Specialization, DeepLearning.AI / Coursera;
 - Machine Learning Specialization, DeepLearning.AI / Stanford / Coursera;
 - ML in Production, DeepLearning.AI / Coursera;
