

MOHAMED AYMAN

Senior Data Scientist | Lead Data Analyst | ML Engineer | Analytics Lead

6th of October City, Giza, Egypt | mohammed.ayman.stat@gmail.com | +20 1060060292 | www.linkedin.com/in/mohamed-ghareb/

PROFESSIONAL SUMMARY

Senior data and analytics professional with 5+ years of experience across banking, telecom, healthcare, sports, consulting, and freelance analytics. Combines predictive modeling, BI, statistical analysis, automation, and stakeholder communication to turn complex data into executive decisions. Experienced in Python, R, SQL, Power BI, Tableau, forecasting, churn analytics, credit risk analytics, and operational dashboards, with current development in Generative AI, AI Agents, AWS AI, deep learning, and ML production.

CORE SKILLS

Machine Learning & AI: Predictive modeling, churn prediction, regression, classification, clustering, time series forecasting, statistical modeling, feature engineering, model evaluation, credit risk analytics, operational forecasting.

Generative AI & AI Agents: Generative AI, AI agents, LLM application concepts, prompt engineering, Amazon Bedrock concepts, AI workflow automation, AI product MVP delivery.

Data Engineering & Cloud: Data pipelines, ETL, data cleaning, data quality, reporting automation, SQL extraction, AWS AI foundations, Microsoft data engineering track in progress.

BI & Analytics: Power BI, Tableau, Excel, Power Query, Power Pivot, KPI dashboards, executive reporting, revenue analytics, market intelligence, performance analytics.

Programming & Databases: Python, R, SQL, MS SQL Server, Oracle SQL, DAX, Power BI data modeling, advanced Excel, statistical analysis.

Leadership & Business: Stakeholder management, cross-functional collaboration, analytics strategy, mentoring, executive communication, data storytelling, English full professional proficiency, 15K+ LinkedIn network.

PROFESSIONAL EXPERIENCE

Lead Data Analyst | Leejam Sports Company | Apr 2025 - Present | Saudi Arabia

- Lead analytics initiatives supporting business growth, operational efficiency, performance management, and executive decision-making.
- Develop dashboards and recurring reporting solutions to monitor commercial and operational KPIs for leadership teams.
- Built a customer churn prediction model to identify at-risk members and support retention analytics. [Add model metric: AUC, recall, lift, retention uplift, or campaign conversion.]
- Translate stakeholder requirements into scalable data models, analytical views, and BI outputs; mentor junior analysts and improve insight adoption.
- Streamline reporting and data preparation processes to improve accuracy, consistency, and speed of delivery. [Add reporting time saved.]

Data Scientist Supervisor, Consultant | IDH | May 2024 - Present

- Design and deliver machine learning and analytics solutions for operational forecasting, performance monitoring, and business optimization.
- Build dynamic dashboards that give leadership faster access to actionable insights and reduce manual decision cycles.
- Improve data workflows and analytical pipelines to strengthen processing accuracy, reporting reliability, and business visibility.
- Partner with analytics, IT, and business stakeholders to convert operational challenges into practical data science use cases. [Add metric: forecast accuracy, cost reduction, or efficiency gain.]

Data Analytics Officer | Credit Agricole Egypt Bank | Jul 2023 - Apr 2024

- Automated Retail Risk reporting pipelines, improving efficiency by 40% and reducing manual reporting errors.
- Developed Power BI dashboards to track credit risk KPIs, cost of risk, portfolio performance, and policy impact.
- Supported IFRS 9 model analysis, ad-hoc investigations, and analytical reviews for strategic risk decisions.
- Delivered data-driven insights for retail risk stakeholders using SQL, Power BI, and statistical analysis.

Data Analyst | Huawei Technologies Co. | Jan 2022 - Jun 2023

- Managed Egypt incentive calculation analytics for telecom dealers and operators, supporting accurate commercial performance tracking.
- Automated executive reporting workflows, saving over 30 hours per month in manual work.
- Built market analysis and competitive intelligence dashboards to support strategy, sales planning, and business performance reviews.
- Delivered analytical problem-solving training sessions for business teams to improve data interpretation and decision quality.

Freelance Data Analyst / AI Product Contributor | Upwork & Private Client Work | Oct 2019 - Present

- Completed 120+ freelance analytics projects for global clients while maintaining a 4.9+ rating.
- Contribute as a freelance data/AI professional to InteriorAiMVP, a company-delivered AI interior design MVP; scope kept confidential while highlighting applied AI product delivery.
- Delivered dashboards, data cleaning, survey analysis, statistical modeling, and performance insights for business and research clients.
- Supported academic researchers and business clients with research design, statistical consulting, and analytical interpretation.

SELECTED PROJECTS & BUSINESS USE CASES

- Customer Churn Prediction & Retention Analytics, Leejam: built a churn model to flag at-risk members and support retention targeting, KPI monitoring, and stakeholder decision-making. [Add AUC/recall/lift and business impact.]
- InteriorAiMVP, Freelance AI Product Delivery: contributing to an AI-enabled interior design MVP for a company client; focused on applied AI workflow/product delivery while maintaining client confidentiality.
- Credit Risk Analytics & IFRS 9 Support: built risk dashboards and analytical outputs for Retail Risk teams, supporting credit KPI monitoring, cost-of-risk visibility, and model-related investigations.
- Incentive Calculation Automation: managed and automated incentive-related analytics at Huawei, improving reporting speed, consistency, and executive visibility for telecom commercial operations.
- Executive Business Performance Dashboards: developed Power BI and Tableau dashboards across banking, telecom, healthcare, sports, and freelance projects to help stakeholders monitor KPIs and act faster.

EDUCATION

M.Sc. in Data Science, in progress: Faculty of Graduate Studies for Statistical Research, Cairo University | Expected 2026

B.Sc. in Statistics: Faculty of Economics and Political Science, Cairo University | 2021

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Completed: Microsoft Power BI Engineer, DEPI (2024); Business Intelligence Developer, ITI (369 hrs, 2023); Diploma in Data Science, Machinify (2022); Credit Scoring Analysis with Python, 365 Data Science (2022); Data Analyst Career Path, LinkedIn Learning (2021); IBM Data Analyst Professional Certificate, Coursera (2019); Data Analyst Nanodegree, Udacity (2019); The Data Scientist's Toolbox, Coursera (2019); Project Management: The Basics for Success, Coursera (2019); Finance for Non-Financial Professionals, Coursera (2019).

In Progress: AWS Generative AI and AI Agents with Amazon Bedrock Professional Certificate, Coursera; Generative AI Engineering Learning Path, Coursera; AWS Artificial Intelligence Practitioner, Coursera; Deep Learning Specialization, DeepLearning.AI / Coursera; Machine Learning Specialization, DeepLearning.AI / Stanford / Coursera; ML in Production, DeepLearning.AI / Coursera; Data Engineering Scholarship, DEPI Egypt - Track: AI & Data Science, Job Profile: Microsoft Data Engineer.
